4. Bear
5. Blubber

C. True or False – Answers

1. False
2. True
3. True
4. True

D. Match the Following – Answers

A - 3 (Owl – Neck rotation)

B - 1 (Frog – Cold-blooded animal)

C - 2 (Bear – Omnivore)

D - 4 (Blubber – Layer of fat for warmth)

E. Short Answer Questions – Answers

1. The owl can rotate its neck 270 degrees. This helps it spot prey without moving its entire body.
2. Monotremes are unique because they are mammals that lay eggs instead of giving birth to live young.
3. Blubber is a thick layer of fat found in animals like seals, whales, and polar bears to keep them warm.
4. Two omnivorous animals are bears and humans.
5. A koala is not a true bear because it is a marsupial, not a member of the bear family.
