Answers - Match the Following

A — 1

B — 2

C — 3

D — 4

E — 5

Answers - Short Answer Questions

1. Reptiles are cold-blooded vertebrates with scaly skin. Examples: lizards, snakes, crocodiles.

2. The basilisk lizard can run on water because of its speed and the shape of its feet, which create air pockets.

3. A chameleon's tongue shoots out extremely fast—within one-hundredth of a second—to catch prey.

4. The gharial has long, narrow jaws and about 106–110 sharp teeth, adapted for catching fish.

5. Komodo dragons are dangerous because they use ambush tactics, have strong jaws, and feed on carrion and live prey.
